Fundstrat Capital – Meet the Team

Thomas J. Lee, CFA
CIO & Portfolio Manager

Thomas J. Lee is the CIO & Portfolio Manager, Managing Director, and Head of Research at the Sub-Advisor. He co-founded Fundstrat Global Advisors in 2014, a research firm serving clients in over 26 countries. Previously, Tom was J.P. Morgan's Chief Equity Strategist (2007–2014) and Managing Director at Salomon Smith Barney. His expertise includes Market Strategy, Small/Mid-Cap Strategy, and Telecom Services. Tom holds a BSE in Economics with a dual concentration in Finance and Accounting from the University of Pennsylvania/Wharton School of Business and is a CFA® charterholder.

Ken Xuan, CFA, FRM
Portfolio Manager

Ken Xuan is a Portfolio Manager at the Sub-Advisor and Head of Data Science at Fundstrat Global Advisors, where he manages the firm's proprietary portfolio and quant models. He oversees data-related tasks, including identifying alternative data sources, updating databases, and automating reports. Prior to joining Fundstrat in 2017, Ken worked at West Monroe Partners and BYD Motors Inc. He holds B.S. degrees in Management and Economics from Purdue University and an M.S. in Operations Research from Columbia University. Ken is a CFA® charterholder and an FRM-Certified Professional.

Carrie Presley
ETF Product Specialist

Carrie is the ETF Product Specialist at Fundstrat Capital. With over a decade of experience in public accounting, she joined Fundstrat in 2021, where she played a pivotal role in launching Fundstrat Media, transforming the delivery of financial research to both retail and institutional clients. In her current role at Fundstrat Capital, Carrie is instrumental in supporting GRNY investors and driving the continued success of the ETF. She holds a BBA in Accounting from the University of Oklahoma.

Fundstrat Capital – Who We Are

Fundstrat Capital is an **independent asset manager** employing insights rooted in emotion-free analysis of multivariate thematic factors to generate the Fundstrat Granny Shots US Large Cap ETF.

Today's investment landscape is broadly divided into those investors using passive investment strategies and those relying on active, bottom-up fundamental security research.

The Fundstrat Granny Shots ETF employs an active top-down thematic approach combined with a quantitative, bottom-up model, offering investors a differentiated approach likely absent from their asset allocation.

Source: Fundstrat Capital

- **Affiliate of Fundstrat Global Advisors:** Fundstrat Capital is an affiliate of Fundstrat Global Advisors, an independent research firm established in 2014.
- **Global Reach:** Fundstrat Global Advisors distributes research to over 26 countries across multiple channels spanning from retail to leading investment institutions.
- **Risk and Compliance:** Fundstrat Capital's Investment Committee uses a combination of internal and external resources to ensure portfolios are in line with their stated investment objectives. John McDevitt, CFA serves as the Chief Compliance Officer.

Fundstrat Granny Shots US Large Cap ETF - GRNY

Seeks to **Identify** the most important themes driving the economy and US market.

Aims to **select** the best stocks benefitting from the tailwinds created by those themes.

Leading to a concentrated portfolio of large-cap equities, driven by significant market forces.

Source: Fundstrat Capital

Fundstrat Granny Shots US Large Cap ETF - GRNY

Investment Philosophy

The GRNY investment process selects a portfolio of stocks that match certain themes identified by the Portfolio Managers.

The investment process combines a top-down fundamental research process with a quantitative, bottom-up stock selection process. Those stocks which are represented in at least two of the themes identified are included in the Fund.

Strategy Overview

- **Inception Date:** November 2024
- **Benchmark:** S&P 500
- **Exchange:** NYSE Arca
- **Issuer:** Tidal Financial Group
- **Number of Holdings:** 20-50 stocks
- **Ticker:** GRNY
- **Annual Expense Ratio:** 0.75%
- **Primary Investments:** US Large Cap Equities
- **Sub Advisor:** Fundstrat Capital

Why Fundstrat Granny Shots US Large Cap ETF

Fundstrat Capital - Investment Guiding Principles

1. Focus on the long term
2. Consensus is usually wrong¹
3. Demographics are destiny²
(aka thematic investing key)
4. Markets have an “age bias”³
5. Don’t fight the Fed⁴

1: Fundstrat Capital relies upon evidence and data to support market views and does not rely open the collective views of others. If our research leads us to a conclusion that differs from collective consensus, we are not deterred.

2: The correlation between demographic trends and US equity market results is observable historically and is used by Fundstrat Capital in ex-ante forecasting.

3: Historical events tend to shape the investment decisions and risk tolerance of older investors, who tend to have accumulated more wealth. Those whom have experience multiple market crashes (dot-com, GRC 2008, and COVID 19) are often more conservative and prioritize preservation of wealth.

4: Fundstrat Capital agrees with the well-known investment adage suggesting investors align their strategies with the Fed’s monetary policies. This is grounded in the firm’s macroeconomic research.

GRNY Theme Introduction – Style Tilt

Style tilts, sometimes referred to as portfolio tilts, represent a portfolio's exposure to various factors that may allow investors to achieve a higher expected return.

Historically, various factors have engendered cyclicalities across market and economic regimes. For example, a shift in interest-rate expectations may cause one factor to outperform another.

The GRNY ETF attempts to capture these regime shifts over time by adjusting the style tilt quarterly. Moreover, the GRNY ETF expands the traditional Value / Growth tilt spectrum into a larger set of 12 components.

GRNY Theme Introduction - Seasonality

Historically, certain industry groups or stocks may exhibit recurring patterns of performance during specific time periods.

By reviewing various arrays of returns over long time periods, the GRNY ETF seeks to determine which industries may exhibit superior relative performance over the ensuing 6-month period.

The GRNY ETF evaluates its seasonal exposure to industry groups quarterly via the use of proprietary models that analyze historical win ratios.

GRNY Theme Introduction - Purchasing Managers' Index (PMI)

The Purchasing Managers' Index (PMI) is a monthly economic indicator based on survey responses by private-sector companies in the manufacturing and services sectors.

The index typically includes factors such as new orders, production, employment, supplier deliveries, and inventories.

Fundstrat Capital recognizes the relationship between yield-curve dynamics and PMI that implies the latter has bottomed and seeks to gain exposure to companies benefitting from the forecasted recovery.

Top 5 Cyber Predictions for 2024: A CISO Perspective

DEEPEEN DESAI – Chief Security Officer
January 02, 2024 – 10 min read

The generative AI (r)evolution

2023 will be remembered as the year artificial intelligence (AI) rose to the forefront of our collective consciousness, ushering in never before seen opportunities and risks. The release of generative AI-powered applications like ChatGPT highlights the potential for AI and machine learning (ML) to reshape how organizations operate. In September, the Zscaler ThreatLabz team conducted an analysis of AI/ML and ChatGPT trends amongst enterprises stretching back across 2023 and, unsurprisingly, discovered upward trajectories in AI/ML traffic and usage.

This adoption brings us to the flip side of the generative AI coin: **attackers are leveraging AI tools to elevate and automate phishing campaigns, craft extremely evasive malware, and reduce the development time of threats across the board.** Security leaders and enterprises find themselves at a new crossroads, tasked with delicately navigating the interplay of securely leveraging AI's evolutionary advancements while confronting the unforeseen revolutionary challenges of safeguarding against AI-powered threats.

GRNY Theme Introduction - Millennials

For most of the past decade, discussions about millennials (96 million, peak size) have focused on their youth and teenage tendencies.

Meanwhile, their economic impact on the U.S. and global economy has been accelerating. Demographics explain business cycles better than most market participants recognize.

In order to capture the effects of this growth, these stocks represent industries where spending by Millennials will outpace the spending by Boomers or represent industries where Millennials' spending is expected to accelerate expenditure growth.

Source: Fundstrat, UN DESA

Prior periods of labor shortage saw a surge in Technology spending...

Technology spend (as % GDP) is shown below and the shaded areas show the two prior periods of “labor shortage” (population outstripped worker growth).

- As shown, during both periods, Technology spend rose sharply as % GDP (+100bp, +170bp, respectively). This rise is not surprising—after all, companies meet production demands by automating.
- We believe Technology spend could rise to 5.5% of GDP from 3.6% in 2015 (when the shortage of labor started), given the large labor shortage developing.

Figure: Technology spend as % GDP

Starting in 1947. Based on the sum of GDP components of Information Processing plus software (as % GDP)

Operations & Compliance Deliverables

- Tidal's Compliance team works closely with the Tidal Trading group to implement and maintain pre-and post-trade compliance controls in our Bloomberg trading process. These controls integrate customized rules based on fund Prospectus and Statement of Additional Information, as well as applicable requirements of the Investment Company Act of 1940 and Tax Code (Regulation M diversification tests).
- Tidal's Bloomberg trading platform integrates compliance functionalities with portfolio management and trading capabilities. It provides tools for pre-trade compliance checks, post-trade monitoring, real-time alerts, trade reconstruction, and reporting.
- Members of the Tidal compliance have direct oversight of portfolio compliance in the trading process through the Bloomberg system and real-time, intra-day communications with Tidal trading professionals.

Tidal's Intra-Day Spread Monitoring & LMM Engagement

- Example: Bid/Ask spread (10.18/10.19) deviating from underlying NAV (10.16)
- Result: Contacted Market Maker who adjusted spread ensuring better execution

Disclosures

Investors should consider the investment objectives, risks, charges and expenses carefully before investing. For a prospectus or summary prospectus with this and other information about the Fund, please call 212-293-7140 (option 3), or visit our website at grannyshots.com. Read the prospectus or summary prospectus carefully before investing.

The principal risks of investing in the Fund are summarized below. As with any investment, there is a risk that you could lose all or a portion of your investment in the Fund. Some or all of these risks may adversely affect the Fund's net asset value per share ("NAV"), trading price, yield, total return, and/or ability to meet its investment objective. For more information about the risks of investing in the Fund, see the section in the Fund's Prospectus titled "Additional Information About the Fund-Principal Risks of Investing in the Fund."

Equity Market Risk. Common stocks are generally exposed to greater risk than other types of securities, such as preferred stock and debt obligations, because common stockholders generally have inferior rights to receive payment from specific issuers.

Models and Data Risk. The composition of the Fund's portfolio is heavily dependent on investment models developed by the Sub-Adviser as well as information and data supplied by third parties ("Models and Data"). When Models and Data prove to be incorrect or incomplete, any decisions made in reliance thereon may lead to the inclusion or exclusion of securities from the Fund's portfolio that would have been excluded or included had the Models and Data been correct and complete.

Operational Risk. The Fund is subject to risks arising from various operational factors, including, but not limited to, human error, processing and communication errors of the Fund's service providers, counter parties or other third-parties, failed or inadequate processes and technology or systems failures. The Fund relies on third-parties for a range of services, including custody.

New Fund Risk. The Fund is a recently organized management investment company with no operating history. As a result, prospective investors do not have a track record or history on which to base their investment decisions.
